THE REGISTER OF HISTORIC RESOURCES IN EDMONTON

SUMMARY

In 1993 a team of consultants who evaluated Edmonton's pre 1945 historic resources, according to established criteria, completed the *Register of Historic Resources in Edmonton.*
The following document identifies and lists:

1) Those buildings/structures designated as *Municipal Historic Resources.*
2) Those buildings/structures on the Register identified on the *A* and *B* lists, and
3) Appendices to the *Register.*

The *Register of Historic Resources in Edmonton* identifies buildings, structures, and other resources within the City of Edmonton which are either *Municipal Historic Resources* or those eligible for designation as *Municipal Historic Resources* (as adopted by City Council and amended by the General Manager of the City of Edmonton Planning and Development Department).

HISTORY

The first version of the *Register of Historic Resources in Edmonton* was created in 1983 and included only buildings in the downtown. The Edmonton Historical Board was given the responsibility of completing the *Register* with the assistance of the Planning and Development Department. In 1988, City Council directed the Administration to "conduct a comprehensive inventory of all historic and/or architecturally significant buildings in Edmonton." The Terms of Reference for this project was prepared and in 1992 a team of consultants was hired to conduct the inventory. Edmonton's first city-wide *Register of Historic Resources in Edmonton* was completed in 1993. City Council adopted the *Register* on May 9, 1995.

While identifying the City's *Municipal Historic Resources*, in recognition of the limited resources available to implement Policy C-450A (A Policy to Encourage the Designation and Rehabilitation of Municipal Historic Resources in Edmonton), the *Register* also identifies two groupings; the "A" and "B" Lists. All resources listed in the "A" and "B" Lists may merit designation as *Municipal Historic Resources*. Such a designation enables owners to be eligible for assistance under Policy C-450A. "A" list structures will be given priority. Applications to demolish any "A" list buildings will be brought to a Heritage Planner and City Council's attention prior issuing any demolition permits. Applications to demolish any "B" list buildings will be brought to the attention of a Heritage Planner and the Councillors of the Ward in which the building is located, prior to issuing any demolition permits. Demolition permit applications for *all* City-owned buildings on the *Register* will also be brought to Council's attention. Priority will be made to look at non-demolition options.

APPENDICES TO THE REGISTER

The *Register* also contains Appendices that do not form part of the identified *Municipal Historic Resources, "A" or "B"* lists. These Appendices list other resources with historic and architectural significance. The Appendices will be used to raise the awareness of these resources in order to encourage their maintenance and preservation. The Appendices to the *Register* include: 16 buildings at Fort Edmonton, 28 landscapes, 12 cemeteries and monuments, 2 street furnishings, and 13 architectural fragments.

AMENDMENT PROCESS

The *Register* will be updated and amended as information and circumstances affecting historic resources in Edmonton change. A policy to amend the *Register* entitled "The Policy to Maintain and Amend the Register of Historic Resources" has been established by the Planning and Development Department through the assistance of the Edmonton Historical Board. The list of resources identified in the Appendices will be updated and expanded as more information is acquired. For further information, please contact Principal Heritage Planner Robert Geldart at 496-6123, or Heritage Planner David Holdsworth at 496-5281.

HOW TO READ DESCRIPTIONS OF THE FIELDS IN THE REGISTER OF HISTORIC RESOURCES

These fields are found on the top row of the following charts.

N'HOOD (Neighbourhood)

Resources on the *Register of Historic Resources* are separated into neighbourhoods.

ID NUMBER

Once separated into neighbourhoods, structures and buildings on the *Register of Historic Resources* are assigned ID numbers. The ID number of a structure, in conjunction with its neighbourhood, allows that structure to be uniquely identified within the *Register*. For example, the LeMarchand Mansion is listed on the *Register* as OLIVER 1A – indicating that this building is located within the Oliver neighbourhood, is on the "A" list of resources, and has a label of 1A.

NAME – BUILDINGS

Most buildings on the *Register* are named properties – usually identifying the original owner(s) of the building. In an attempt to provide relevant information on Edmonton's Historic Resources, original building names are used to the greatest extent possible.

ADDRESS

The current municipal address of a historic resource is listed on the *Register*.

DATE

Construction dates for buildings on the *Register* are listed in one of three formats. If the building was built during a single year, the year of construction is listed, e.g. 1914. Similarly, if the structure was built over a number of years, the construction interval is listed, e.g. 1911-1913. Certain structures on the *Register* were built in stages. Buildings that were constructed in stages list the two separate construction dates, e.g.1920/28. Occasionally, the exact construction date of a building is unknown. However, records from the period may provide a good indication of when it was likely that the building was erected. In this situation, a circa marking is included in front of the date of construction, e.g. c1937.

ARCHITECT and BUILDER

A resource's architect and builder are listed if known.

USE

The current land use function of the structure is listed in abbreviated form – usage codes are listed at the end of the *Register* in the "Usage Codes" section, e.g. SDD = Single Detached Dwelling.

DES (Designation)

The current designation status of the building is listed in abbreviated form – designation status codes are listed at the end of the *Register* in the "Abbreviations" section, e.g. PHR = Provincial Historic Resource.
